BOOT  **DOC**

TUNE YOUR FEET

A hiker in a red jacket and pants, carrying a backpack and using trekking poles, is shown in a black and white photograph. The hiker is positioned in the upper left quadrant of the image, looking towards the right. The background shows a snowy mountain landscape.

BOOTDOC

YOUR SPECIALIST FOR CUSTOMIZED ATHLETIC FOOTWEAR

BD designs unique solutions for active feet that guarantee excellent comfort and performance when taking part in sport. What sets BD apart is the most innovative analysis methods and products that are designed to meet the individual needs of each customer – specifically customers who seek out the latest advancements in development and technology.

BD strives to be a part of this journey by supporting their feet and developing the tools for them to improve their performance.

HOTRONIC®

HEATING SYSTEM

HOTRONIC Heat Socks, heatable insoles, and boot and glove dryers complement the product range for customers.

THREE EASY STEPS TO THE PERFECT FIT.

Here's how you can find the perfect fit with the ASC concept for every customer quickly and easily:

1. ANALYZE

There are five different analysis devices to choose from that determine the foot type, length, width and other data concerning athletes' feet. From the three-dimensional representation of both feet using the BD 3D Scanner VANDRA to the quick and easy-to-use Feet View, we offer the following devices for foot type analysis: BD 3D Scanner VANDRA, BD Podoscope, BD Feet View, FMD (Foot Measuring Device), BD Measuring Gauge Brannock (length and width measurement).

2. SELECT

Once the foot type has been determined, it is easy to find the appropriate insole, suitable Power Fit socks, and foam liners. Choose the product that is going to meet the athletes' requirements for their sport or activity, whether it's skiing, snowboarding, hiking or running, and so on.

3. CUSTOMIZE

Regardless of whether they're Step-In, Fusion or 3D Custom, all BD insoles can be custom molded and fitted precisely to the foot of an athlete through heating.

BD offers a variety of tools for customizing insoles:

Heating: BD 3D Heater, BD Speed Heat Digital, BD Speed Heat Digital 3L, BD Heat Gun

Fitting: BD VAC IV Electric, BD Pillows 13, CMT-System

BD 3-ARCH CONCEPT

THE FAST SOLUTION.

You can cover all sports with three models, each with three different constructions for the various foot types. Follow the simple foot type analysis steps and select an insole of the three models in LOW, MID or HIGH Arch. Insert the insole into footwear and you're finished! Individual fitting can be offered as an extra service that ensures customers get a fit that is 100 % perfect. The wide range of insoles guarantees the right insole for every foot type.

LOW ARCH

The arch is incapable of cushioning, thus reducing the spring in the customers step or running motion. Displacement of the bones involved (e.g., buckling of the ankle bone, heel bone) can cause strain on tendons and ligaments. This leads to static imbalance. The BD LOW Arch footbed helps to prevent overpronation.

MID ARCH

The layout of the bones, tendons and ligaments reflects the theoretical norm. The pressure below the foot is distributed over the 3 main support points: heel (20 %), big toe base joint (17 %), small toe base joint (13 %). A BD MID Arch footbed offers optimum pressure distribution for this type of foot, while stabilizing and cushioning.

HIGH ARCH

The long-arch is too high, thus reducing the contact surface. High medial and lateral arches are typically caused by shortening of the tendon structure or high muscle tension. These changes of the foot shape cause friction and pressure points when wearing shoes. A stressed tendon structure is often found throughout the body in this case. A BD HIGH Arch footbed ensures comfortable, even pressure distribution for this foot type.

3D CUSTOM INSOLES

If you need a personalized solution, look no further than the BOOTDOC 3D CUSTOM footbed range. In this segment, there are no compromises. The fitting process with 3D CUSTOM insoles from BOOTDOC is considered premium technology, and rightly so. It's not just about finding the perfect fit; it's also about passion, technology, know-how and most of all, a personal, thoughtful experience.

BOOTDOC IS OFFICIAL
INSOLE SUPPLIER OF
THE AUSTRIAN SKI TEAM.

BD 3D COMFORT S9

01-040x-047-x | Size: XS – XXL

For performance-orientated athletes with very high comfort requirements.

- Comfort entry thanks to a Microfiber Top
- Perfect pressure distribution thanks to a 1.5 mm PE cushioning layer
- Maximum stability thanks to an integrated heel stabilizer (1.0 mm) and an external mid and rear foot stabilizer (1.0 mm)

95

BD 3D RACE S9

01-0400-066-x | Size: XS – XXL

The premium model for maximum performance.

- Perfect support thanks to a perforated PE Top-Grip surface (1.6 mm)
- Maximum transmission of energy thanks to an integrated stability plate
- Excellent precision thanks to the layer being extra thin

95

VALUEPACK (5 PAIRS/PU)

01-0400-090-x | Size: XS – XXL

BD 3D X-WIDEBODY

01-0409-021-x | Size: XS – XXL

The comfort model for extra wide feet and ski boot lasts.

- Optimal cushion thanks to a perforated PE top
- Maximum comfort thanks to a 2.0 mm PE cushioning layer
- Maximum stability thanks to an integrated mid and rear foot stabilizer (1.0 mm)
- For extra wide feet and lasts
- Slide zone in the arch area, which makes the boot easier to put on

3D INSOLE FITTING

1

Material is pushed back to the rear part of the pillows to form a plateau. Next, air is pulled out to create a vacuum.

2

The customer should sit in a 90-90-90 position with the legs hip-width apart and put the feet on the vacuum pillows. The VAC IV offers the possibility to adjust the width of the molding pillows! Then, enough air to enable one of the feet to be copied needs to be let into the cushion.

TIP: The customer should apply no pressure to their foot at all, so that it can be positioned and copied correctly.

3

The heel should be pressed by the technician into the vacuum pillow while in a neutral position, and the area from the midfoot to the toes should then be carefully embedded in the pillow. Pull out more air to harden the cast.

4

Smooth out the pillow in front of and around the toes, so that an insole can be placed in the best possible position in the forefoot and toe area.

5

Heat the BD 3D Heater to the desired temperature, insert the insoles, and activate the timer. Avoid heating the insole too much and for too long as this will have a negative effect on the materials and the cooling time!

6

Position the heated insoles in the vacuum pillow starting from the heel and working toward the toes. Be sure to align the footbed properly.

7

Ask the customer to stand on the insoles and put all their body weight on them for five minutes. Ensure the customer is standing with the feet hip-width apart when doing this. **ATTENTION:** Allow the insoles to cool down for a further five minutes so that they harden completely. Once the 3D insoles have cooled completely, you can remove them from the 3D VAC and finish them (by sanding, cutting and/or milling them).

3D CUSTOM INSOLES

3D CUSTOM INSOLES

HERE'S WHAT OUR CUSTOMERS HAVE TO SAY.

Layer-by-layer, create your own 3D design to suit your exact needs, and personalize it with your own logo! Footbed technology made-to-measure!

Brent Amsbury,
Certified Pedorthist, owner Park City Ski Boot:

"Professional ski boot fitters know that the footbed is the deciding factor in the perfect fit, and that the best results not only depend on knowledge and experience, but also on the quality of the selected materials. It's really satisfying to work with materials that provide excellent foot mapping. BOOTDOC footbed blanks have been created according to my own specifications, which means that I can adhere to and control important criteria such as detailed foot mapping and deep contours. This provides the customer with the best possible support and comfort."

Marcel Hagleitner,
Sportshop Hagleitner, Saalbach:

"The bespoke shape of the insole is the most important thing for me. There's absolutely no question that the insole has to be a perfect fit in order to provide the best possible support and comfort. We are so impressed with the quality of BOOTDOC insoles that we have put our own company logo on them, which shows just how high the quality of the product is and how important proper boot fitting is to us."

BUILD YOUR OWN 3D CUSTOM FOOTBED.

1 TOP LAYER

4 CHOICES OF MATERIAL TO BALANCE GRIP AND CUSHION

FOAM

The classic, economical choice. 2 mm or 3 mm of cushioning foam that also increases top surface grip.

JERSEY FABRIC

Polyester tight weave fabric that provides an economical solution for reducing surface friction and reducing blisters. This material can be shaped and styled in a number of colors and graphic patterns.

MICROFIBRE

Increases insulation and foot comfort through efficient moisture wicking. Reduces surface grip.

FUNCTIONAL-MESH

The premium top cover. Silver threads reduce odor, reflect heat back to the foot, and provide unique easy to enter surface that looks great.

MERINO

Be it spring, summer, autumn, or winter, the extremely fine fibers of Merino wool ensure effective temperature equalization and optimum foot climate.

2 MIDDLE SUPPORT LAYER

2.0 OR 2.5 MM HEAT MOLDABLE RESIN

- 2.0 mm for low volume applications such as racing or high performance freeride.
- 2.5 mm for general use and medium volume fitting.

3 BOTTOM SUPPORT AND REINFORCEMENT

PCL ARCH SUPPORT

This thermally moldable 2 mm performance plastic serves as a reinforcement layer for optimal support in arch and heel areas.

REFOSTAB

Heat moldable material in a selection of rigidities for the targeted control of the support and stabilization function in the necessary areas. Can be applied internally or externally.

APPLICATION EXAMPLE

FUSION PRESHAPED INSOLES

The BOOTDOC Fusion Preshaped insoles are based on 3D CUSTOM Technology, but have already been preshaped for quick and convenient processing. Custom molding for the customer at the POS provides greater comfort, stability, and activity-specific support. Due to their construction, these insoles are designed to meet an extremely wide range of requirements and impress down to the very last detail.

OFFICIAL SUPPLIER
OF THE GERMAN SKI
NATIONAL TEAMS.

BD FF COMFORT S9

01-0400-104-x | Size: XS – XXL

The latest Fusion development with a 3D base construction for performance athletes.

- Comfort entry thanks to a Microfiber Top with anti-odor function
- Perfect pressure distribution and cushioning
- Maximum support thanks to integrated stabilizers

95

BD FF TX S9

01-0400-116-x | Size: S – XXL

A Fusion insole with a 3D base construction that includes a Microfiber Top for easy entry.

- Comfort entry thanks to a Mesh Top
- Excellent comfort and extra light materials
- Dynamic in the forefoot area

95

BD FF S9 MERINO

01-0400-114-x | Size: XS – XXL

The BD FF S9 MERINO is the ideal footbed for use all year round. Be it spring, summer, autumn, or winter, the extremely fine fibers of the Merino wool ensure effective temperature equalization and thus an optimum foot climate.

- Tried-and-tested, durable FFS9 base construction
- Merino top for warm feet and optimum foot climate

95

NEW

BD FF S9

01-0400-071-x | Size: XS – XXL

A best-seller developed specifically designed for foam injection and thermally moldable liners.

- Perfect support thanks to a perforated PE Top-Grip surface
- Maximum stability and support
- Maximum transmission of energy thanks to an extra thin design
- Slide zone in the arch area, which makes footwear easier to put on

95

= Performance, = Improve, = Basic

BD FF SUPREME

01-0400-133-x | Size: S - XXL

NEW

Fusion insole with a 3D base construction that includes a Microfiber Top.

- Comfort entry thanks to a Microfiber Top
- Excellent comfort and extra light materials
- Dynamic in the forefoot area

95

BD ADVENTURE T9

01-0400-098-x | Size: XS - XXL

The first BD Step-In insole for outdoor sports with a 3D base construction and a surface that is 100 % real leather.

- Perforated surface made of 100 % genuine leather for a perfect foot environment
- Maximum cushioning, thanks to PORON® as well as outstanding stability
- Perfect grip for both uphill and downhill sport

95

BD SPEED 9

01-0400-080-x | Size: S - XXL

Developed for all activities requiring a stable, thin insole for optimum transmission of energy. Thanks to its thin design, this insole can be worn in many different types of shoe.

- Perfect support thanks to a perforated EVA Top-Grip surface
- Extremely thin and lightweight with maximum stability
- High transmission of energy thanks to a duo structure

90

BD PERFORMANCE R9

01-0400-102-x | Size: XS - XXL

The first BD Step-In insole for running with a 3D base construction featuring a special rebound effect.

- Lightweight design with improved stability
- Boasts a perforated surface with a Microfiber-Jersey Top and a built-in anti-odor function
- Ideal guide properties and maximum stability
- Offers the perfect combination of cushioning and rebound thanks to PORON® Vive®

ACCESSORIES

BD NEOPREN COVER

01-2100-060-x | Size: S, M, L

A neoprene protective cover for ski boot and wintersports footwear.

- The perfect insulator featuring durable neoprene
- Fits the shape of the foot perfectly thanks to its stretch material
- Additional volume reduction function

DISPENSER (5S, 5M, 5L): 01-2100-062

BD GEL PADS

01-2100-017 | Size: uni

- "First aid" for bruising caused by the ski boot tongue
- Reduces friction and pressure in the shin area
- Multiple use
- Shape can be individually cut to size

DISPENSER (20 pairs) 01-2100-058

STEP-IN INSOLES

BOOTDOC Step-In insoles make your day perfect – be it playing sports, in the workplace, or enjoying some leisure time. We offer the right model – anatomically preshaped according to the 3-Arch concept or in an anatomically shaped universal fit – regardless of whether the customer is looking for comfort or a sporting challenge. The Step-In design offers something for everyone, as well as quick and easy custom molding of the individual footbed.

BD COMFORT S8

01-0400-13x-xxx | Size: MP 23.0 – 31.0

The top 3-Arch Concept model in MP 23.0 to 31.0 with full-shell technology and dampening element.

- Shape in Mid Arch based on FF S9
- A large forefoot dampening element
- Anatomic dampening in the heel
- Dampening in the area of the 5th metatarsal
- Flexzones in arch
- Improved heel cup
- Perfect visibility of foot type colour system

LOW: 01-0400-135-xxx

MID: 01-0400-136-xxx

HIGH: 01-0400-137-xxx

BD STABILITY 7

01-0409-00x-x | Size: MP 23.0 – 31.0

The all-purpose 3-Arch Concept genius for all sports that require maximum support and stability within their shoes.

- Optimal support thanks to a Grip-Mesh Top with a built-in anti-odor function
- A large forefoot dampening element
- Anatomic dampening in the heel
- Added dampening at the base of the 5th metatarsal
- Flexzones in arch
- Improved heel cup for better stability
- Perfect visibility of foot type colour system
- Maximum stability in the rear foot area

LOW: 01-0409-001-x

MID: 01-0409-002-x

HIGH: 01-0409-003-x

BD DYNAMIC 5

01-0409-01x-x | Size: MP 23.0 – 31.0

The basic all-purpose model with the 3-Arch Concept for all sports involving dynamic movements.

- Microfiber-Jersey with a built-in anti-odor function
- Boasts a very lightweight, breathable design
- Dampening elements in forefoot and rear foot

LOW: 01-0409-012-x

MID: 01-0409-013-x

HIGH: 01-0409-014-x

BD CORK T5

01-0400-100-x | Size: MP 21.0 – 31.0

An all-purpose base construction with a cork surface featuring self-regulating moisture management.

- Has a cork surface with outstanding grip qualities
- Excellent fore foot and rear foot cushioning thanks to PORON®

BD MOTION 5

01-0409-011-x | Size: MP 23.0 – 31.0

The all-round model for all dynamic sports.

- Perfect support thanks to an EVA Top-Grip surface
- Perfect cushioning with good stability

BD JUNIOR S5

01-0400-138-190 | MP 17/18/19

01-0400-138-210 | MP 20/21

01-0400-138-230 | MP 22/23

Sporty design for children's and youth activities.

- Anatomical insoles for children and teenagers
- Boasts a Mesh Top with a built-in anti-odor function
- Available in 3 sizes

BD GEL COMFORT

01-0400-1xx | Size: 36 – 45

BD GEL COMFORT insoles provide more comfort for the foot, whether for sports or everyday activities.

- Gel insoles made from 2 components for perfect cushioning
- Gentle support for the heel and arch area
- Optimum, universal fit
- Perforated for breathability

01-0400-139 | Size: 36 – 39

01-0400-140 | Size: 40 – 45

RENTAL INSOLES

**BD S7**

01-0400-108-x | Size: MP 23.0 – 31.0

The premium model that guarantees very easy entry.

- Boasts a Mesh Top with a built-in anti-odor function
- Extremely lightweight with maximum stability
- Perfect transmission of energy thanks to semi-shell construction
- Size is printed on the top surface
- Cardboard packaging

**BD S5**

01-0400-02x-x | Size: MP 23.0 – 31.0

The dynamic sports design for ambitious skiers.

- Boasts a Mesh Top with a built-in anti-odor function
- Maximum comfort thanks to dynamic sport construction
- Size is visible
- Blister packaging

FOAM LINER
FITTING VIDEO

THE BEST SKI BOOT

FOR EVERY KIND OF SKIER.

QUICK FOAM CONCEPT

for the BD Comfort Foam, BD Quick Foam and
BD Performance Foam models

- Simple, fast, and uncomplicated
- No need to tape the feet
- Self-regulating foam volume system
- Membrane instead of tubing the forefoot area
- Asymmetrical tongue system
- Sealed seams for more warmth
- HF-fused foam areas
(Comfort, Quick and Performance models)
- Easy removal of the foam tubing

PRESSURE FOAM CONCEPT

for the BD Worldcup Foam model

- High-pressure foam design made from 2 components
- Asymmetrical racing tongue design
- HF-fused foam areas
- Adhesive material for problem areas
- Sealed seams for more warmth
- Spoiler for calf adjustment

BD QUICK FOAM

01-0900-017-x | Size: 22.0 - 31.0

The Quick & Easy construction that offers optimal support.

- Pleasant and easy entry thanks to a comfort lining
- Spoiler for cushioning and calf adjustment
- Warmer feet thanks to a neoprene toe box and sealed seams
- Fused foam pockets
- Redesigned tongue integration

BD COMFORT FOAM

01-0900-014-x | Size: 23.0 - 31.0

The liner that fits perfectly while providing excellent comfort.

- Excellent comfort thanks to extra wide last
- Fits perfectly thanks to softer upper cuff
- Warmer feet thanks to a neoprene toe box and sealed seams
- Fused foam pockets
- Redesigned tongue integration

BD PERFORMANCE FOAM

01-0900-050-x | Size: 23.0 – 31.0

The BD PERFORMANCE FOAM combines the design of the BD WORLDCUP FOAM with the sophistication of the Quick Foam concept.

- Optimum transmission of energy through racing inner lining and slim "performance" design
- Sole design
- Worldcup Foam design with membrane and Quick Foam concept
- Perfect fit due to asymmetric tongue
- Warmer feet due to neoprene toe box and sealed seams
- Fused foam pockets
- Redesigned tongue integration

NEW

95 - 102

BD WORLDCUP FOAM

01-0900-019-x | Size: 23.0 – 31.0

The liner for high-performance athletes that fits perfectly thanks to an asymmetrical racing tongue.

- Optimal transmission of energy thanks to a racing lining and slim racing structure
- Always fits perfectly thanks to an asymmetric racing tongue
- Strobel sole design
- Warmer feet thanks to a neoprene toe box and sealed seams
- Fused foam pockets
- Redesigned tongue integration

95 - 102

BD FOAM TONGUE

01-0900-007-x | Size: 22.0 – 31.0

An asymmetric, custom tongue for a precise anatomical fit.

- Easy to use thanks to a cartridge system
- Space-saving thanks to an extra thin structure
- Very comfortable foam

BOOTDOC ACADEMY

UNIQUE BOOT-FITTING TRAINING PROGRAM.

The BOOTDOC ACADEMY program is a unique boot-fitting training program and offers every technician an introduction to, or advanced training in, boot fitting. Learn from top professionals and pick up tips and tricks that will enable you to provide your customers with the best footwear fitting service. Since the number of participants is limited, individual assistance is guaranteed during the seminar, and there is sufficient time to practice skills directly on the products.

Newcomers should choose the basic boot fitting seminar, while more experienced participants can register directly for the ADVANCED course.

- Bring your own ski boots or some old ones so that they can be ground and expanded.
- You will receive precise details of what the program involves, hotel options, the location and how to get there after you have registered. Please send your registration to office@boot-doc.com.
- Every participant will receive a personal certificate and participation confirmation from the **BOOTDOC BOOT-FITTING ACADEMY**.

WINTER POWER FIT SOCKS

More performance, better support, and as a pleasant side effect, warmer feet that feel refreshed. BD Power Fit Socks with graduated compression stand out from rivals because of their high-quality workmanship and maximum comfort.

WHY USE POWER FIT SOCKS?

The special technology used for BD Power Fit Socks enables them to provide evenly distributed pressure around the ankle with graduated compression from bottom to top. BD Power Fit socks gently support muscles and tendons during all activities. This helps keep your legs and feet feeling refreshed after even a long day of skiing, running, hiking or on your feet at work. The BD Power Fit design provides stabilizing support for the whole foot.

BD PERFORMANCE POWER FIT SOCKS

BD SOCKS PFI 90 BEEDEE / SOUL / ICE

S ↔ W

90 PFI

01-0500-10x-x | Size: S – XL

High-quality compression socks from our high-performance series with the Tapevene function.

- Individual fitting possible thanks to S & W calf widths
- Optimal stability thanks to the Tapevene function
- Always fit perfectly thanks to elastic zones
- Shin bone protector
- Compression: strong – PFI 90, 18 – 22 mmHg (S) and 15 – 19 mmHg (W)
- Material: 80 % nylon, 20 % lycra

BD SOCKS SOUL
(S): 01-0500-102-x

BD SOCKS PFI 70 LAVA / FIRE / PURPLE

70 PFI

01-0500-10x-x | Size: S – XL

Compression socks for ideal support with merino wool for additional warmth..

- Fit perfectly thanks to stretch zones in the toe and heel areas
- Comfort cushioning in the instep area
- Very durable thanks to reinforcement in the Achilles tendon area
- Compression: medium – PFI 70, 15 – 19 mmHg
- Material: 47 % wool (merino wool), 45 % nylon, 8 % lycra
- New toe seam construction
- Reduced compression in the forefoot

01-0500-108-x

BD SOCKS RACE PFI 50

01-0500-125-x | Size: S - XL

Thin racing sock with antimicrobial and anti-odor properties thanks to innovative copper thread.

- Racing sock with thin design
- Antimicrobial and anti-odor properties through the use of copper
- Reinforcements in the toe and heel areas
- Material: 59 % polyamide, 36 % polypropylene, 3 % copper, 2 % spandex
- Compression: soft – PFI 50, 10 – 15 mmHg

50 PFI

BD SOCKS PFI 50 STYLE / SMOKE / FASHION

01-0500-12x-x | Size: S - XL

Socks that offer a very pleasant compression effect.

- Fit perfectly thanks to stretch zones in the toe and heel areas
- Fit perfectly thanks to elastic zones around the calf
- Easy to put on
- Compression: soft – PFI 50, 10 – 15 mmHg
- Material: 80 % nylon, 20 % lycra
- New toe seam construction
- Reduced compression in the forefoot

BOOTDOC SOCKS IN YOUR DESIGN!

DESIGN YOUR PERSONAL SOCKS USING OUR ONLINE EDITOR.

Select. Design. Send your request.

Order your custom printed Power Fit Socks from BOOTDOC now.

Here's how it works:

1 SELECT YOUR DESIRED POWER FIT SOCKS.

Winter model (knee-high), summer model (ankle-high), basic coloring (color of toe and heel area). Material: 45% nylon, 35% polyester, 20% lycra.

2 PERSONALIZE THE POWER FIT SOCKS WITH YOUR OWN CUSTOM DESIGN.

You can design your Power Fit Socks in our Online Design Editor with practical 3D preview if you do not have a lot of design experience. You can also create your design using your own graphics program. To make things easier, you can download our Power Fit Socks print templates to import into your software.

3 SEND YOUR REQUEST.

Once you have completed your design, simply fill in the request form and send it.

4 CUSTOM PRINTED POWER FIT SOCKS STAND OUT FROM THE CROWD.

Be it for sports retailers, sports teams, clubs, hoteliers, or for marketing promotions, with printed Power Fit Socks from BOOTDOC, your market presence at the POS is strengthened and you will be remembered by your customers. BOOTDOC Power Fit Socks can be individually designed – from a total order quantity of just 300 pairs! Available in sizes S-XL (EU 35 – 48).

You can find our Online Design Editor
with practical 3D preview

POWER FIT SOCKS

MULTISPORT

POWER FIT SOCKS

More performance, better support and feet that feel refreshed. BD Power Fit Socks with graduated compression stand out from rivals because of their high-quality workmanship and maximum comfort.

WHAT IS THE POWER FIT INDEX?

The Power Fit Index (PFI) indicates how strong the overall level of gradual compression is: PFI 30 designates light compression, while PFI 90 is classified as strong and is therefore only found in our performance series.

BD PRO SERIES POWER FIT SOCKS

BD SOCKS TAPEVENE PFI 90

01-0500-xxx-x | Size: XS – XXL

Outstanding properties thanks to optimal compression and the Tapevene function.

- The stirrup effect stabilizes the muscle structure keeping the ankle joint in place
- Ideal for accelerating recovery
- Always fit perfectly thanks to elastic zones
- Compression: strong – PFI 90, 18 – 25 mmHg
- Material: 72 % nylon, 28 % lycra
- New toe seam construction

HOTRONIC

HOTRONIC's XLP ONE series has raised the bar to new heights for foot heating systems. A special lithium-ion technology has been combined with the latest electronics to enable one battery to be used for both the heated socks and heated soles. The cylindrical and ultralight heart of the new XLP ONE battery pack guarantees constant heating power throughout the battery runtime – even at extremely cold temperatures!

HEAT GENERATION

The XLP ONE battery guarantees constant heating power for several hours of heat generation – even at extremely cold temperatures! The heating element is designed to evenly distribute heat across the whole of the toe and ball of foot area.

XLP CONSTANT HEATING POWER CHART

— = THE HEATING PERFORMANCE OF THE LITHIUM-ION BATTERIES

Unlike that produced by conventional batteries, the heating power here remains constant irrespective of the battery pack's level of charge. Even after many hours of use, the heating power remains consistently high.

HEAT SOCKS SET XLP ONE

A set consists of BD Power Fit Socks with an integrated heating element and a powerful lithium-ion battery pack with a charger

- The unique performance of BD Power Fit Socks with integrated heating elements ensures excellent comfort, fit and heat distribution
- The battery packs are easy to connect with the snap fasteners on the inner cuff of the heated socks
- The 4 heating levels are selected directly on the battery pack.
The Power Boost setting provides extra warmth for a short period (approx. 3 minutes)
- Heated toe and ball of foot area with a reinforced toe and heel area
- Heating element in the outer layer for more comfort
- 2-layer cuff design for additional protection and to hold the battery snugly
- Socks machine washable at temperatures up to 30 °C

BOOT DRYER

MICRO DRY

01-0100-5205 | 110-230 V | 12 V

NEW

Compact electric shoe and boot dryer.

We're all familiar with that unpleasant feeling of walking around in cold, wet shoes. Thanks to the MICRO DRY, this is now a thing of the past! The handy shoe and boot dryer for the home and on the go dries ski and snowboard boots, winter boots, casual footwear, sneakers, and work boots gently and efficiently. Gentle drying means that the material is not damaged or even deformed. With its compact dimensions, this lightweight drying device can be placed in the smallest bag and can be conveniently taken anywhere. The MICRO DRY is extremely flexible. You can use it at home or in a hotel, when you're off out for a day of winter sports, or on the way to work: simply plug it in to the 12 V cigarette lighter in your car and preheat your shoes.

- Drying temperature that is gentle on the material to ensure a longer lifetime for your shoes and boots
- Optimum heat circulation
- Protection against overheating (max. 70 °C)
- Included in the scope of delivery are a 110 V plug, a 230 V plug, and a 12 V car adapter.

BOOT, GLOVE AND HELMET DRYER

TECH DRY

01-0100-5206 | 110 V

01-0100-5207 | 220 V

NEW

Electric dryer for shoes, boots, gloves, and helmets.

Using warm air, TECH DRY dries wet shoes, boots, ski boots, and gloves, as well as motorbike, bicycle, and horse-riding helmets, in a short time and without damaging the material. Even leather boots and shoes can be dried thoroughly and with care. As soon as an item of clothing is pulled over the drying attachment, the program starts automatically and warm air is blown from the inside through the clothing. In the winter months, the TECH DRY is indispensable for all those who like to be outdoors whatever the weather, and it can also be used for preheating. Dry clothing is also important for your health!

- Time and temperature setting
- Temperature scale up to 70 °C
- Automatic sensor for start and stop function (can also be set manually)
- Digital display 
- Overtemperature switch-off for greater safety
- Quiet operation
- Removable attachment for shoes, boots, or helmets
- Scope of delivery: 110 V, 230 V plug; 2 x

Attachment for shoes, boots, gloves;
2 x attachment for helmets

APPLICATION OPTIONS

ANALYSIS & FITTING

Professional fitting is based on analysis of the foot. From the three-dimensional representation of both feet using the BD 3D Scanner VANDRA to its easy-to-use Feet View, BD offers several devices that revolve around this. Because each BD insole can be heated and custom molded and BD has designed specific heating devices for each category of insole and customization. Depending on the style of footbed, and experience of the shop, the BD insoles can be customized by using a specialty VAC system or molding pillows.

BD 3D SCANNER VANDRA

SIMPLE. FAST. 3D.

3D SCANNING IN A NEW DIMENSION

The new BD Scanner Vandra, developed in cooperation with the Swedish technology start up Volumental, sets new standards in 3D visualization of feet.

THE TECHNOLOGY

Thanks to the latest technology of 4 depth compensation cameras both feet are measured and 3D rendered within a few seconds. The visualized 3D picture is of the highest precision and can be analyzed from various angles.

THE ANALYSIS

Just step on the 3D Scanner without any other device. No changing of socks or special equipment is required. This guarantees efficiency, high comfort, and no hygiene hassle during the analysis process.

INFORMATION DATA

The BD 3D Scanner Vandra offers vast information about, and eleven measurements of, the foot. The result is visualized in the split-screen app on the tablet. The left side shows the 3D rendered foot which can be looked at from all angles with zoom in /out function. The right side allows you to scroll up or down to view all the measurement data.

- Length and width of both feet as well as size recommendation in US, UK, EU, MP with manual correction option
- Visualization of the foot type LOW/MID/HIGH arch
- Zoom in/out function on the 3D model
- Instep height and heel circumference
- Instep length as well as width and volume recommendation
- Measurement information can be e-mailed to clients

THE DATA

The result of the analysis is a vast number of information and measurements around the foot. The Vandra can not only provide length and width but also arch type, instep height, volume recommendation and other useful information to allow for the best customer service. The data is anonymously stored in an online cloud and is being used for further developments around the footwear and insole business.

THE SIMPLICITY

It's amazing how simple it is to use the Vandra 3D Scanner. The plug & play version includes an intuitive portable touchscreen tablet that is easy to use. The analysis process is done within a few seconds and can be discussed with the customer using the tablet for visuals.

ANALYSIS SYSTEMS

BD 3D SCANNER VANDRA

01-2300-110 | Size: D 67 x W 80 x H 32 cm

The new Vandra 3D foot scanner delivers a three-dimensional image of both feet in seconds.

It provides a wealth of measurement data on instep height, ankle circumference, inner foot length and so on while also recommending sizes. The data can be used to find the right ski boots / sport shoes and insoles quickly. A high level of hygiene and comfort are guaranteed because customers can keep their own socks on while using the scanner, thus eliminating the need to remove their socks.

BD 2D FOOT ANALYSIS

BD PODOSCOPE 4 (INCL. L & W MEASURING GAUGE)

01-2300-146 | Size: D 79 x W 58 x H 117 cm

Precise display of the foot type (LOW, MID or HIGH Arch) via an LED illuminated glass plate.

- Professional analysis and fitting are possible even in very small areas
- Heating and fitting devices can be combined perfectly
- Speed Heat Digital and Molding Pillows need to be ordered separately

OPTIONAL ACCESSORIES PODOSCOPE

BD LASERSET

01-2300-057

- Used to align the leg axis

PODOSCOPE CASTORS

01-2300-076

- Make moving the device easy

BD FEET VIEW

01-2300-072 | Size: D 48 x W 25 x H 5 cm

The BD FEET VIEW offers the simplest form of foot analysis that determines foot arches and sizes quickly.

- Integrated length and width measurement
- Uses a non temperature specific foil, which allows year round use

BD FOIL FOR FEET VIEW

01-2200-049 | 5 pcs. / units

FMD FOOT MEASURE DEVICE

01-2300-118 | Size: 47 x 52 cm

- Robust and simple foot measuring device
- Displays the length of the foot/shoe size as well as the width of the foot
- Classifies the foot as narrow/medium/wide
- Folding mechanism for easy cleaning

MEASURING GAUGE

A robust foot measuring gauge for precise Mondopoint determination of the foot length and width in millimeters.

BRANNOCK

BD AUTOFIT

THE FITTING SYSTEM FOR FOOTBEDS.

THE AUTOMATED FITTING SYSTEM FOR FOOTBEDS.

The newly developed, patent-pending Autofit system adapts footbeds to the customer's foot shape automatically and quickly. The Fit Pods are electrically adjusted to the respective hip width and the preheated footbeds are pressed against the foot using a special membrane and air pressure.

FROM FORE FOOT TO HEEL.

To facilitate optimum positioning of the footbeds in the Fit Pods, a vacuum is generated first. The fore foot covering is adjusted to the correct shoe size and the preheated footbeds are inserted. The customer then places their feet on the footbeds. As the customer is seated, their full weight does not bear on the foot and footbed. A laser helps to align the knee and lower leg.

After switching the Autofit from vacuum to air blowing, the membrane is pressed against the foot from the fore foot to the heel.

The preheated and thus flexible footbed hardens in the exact shape formed by the foot with a partial weight bearing. The result is a perfect fit! The processing time can be adjusted precisely within a predefined time frame and optimized for the respective footbed type.

Errors in footbed production are prevented thanks to the simple, quick, and automated procedure, and reproducible results are ensured. This technical innovation allows for the adaptation of STEP-IN, FUSION, and also 3D footbeds. The Fit Pods and the membrane can be easily replaced if required.

Autofit is offered as a stand-alone solution, but can also be integrated into the BD AUTOFIT CENTER. In addition to handles, this system is also equipped with electric seat height adjustment, so that the customer can always adopt a 90° position to the Fit Pods.

BD AUTOFIT

01-2300-151 | Size: D 55,5 cm x W 65,3 cm x H 15,7 cm

The BD AUTOFIT as a stand-alone solution with adjustable membrane for the customization of footbeds.

- Automatic footbed adjustment in compact design
- Electric hip width adjustment
- Laser-assisted leg axis alignment

BD SILICONE AUTOFIT

01-2300-155 | 2 pcs. / units

OPTIONAL ACCESSORIES AUTOFIT

BD AUTOFIT POD LEFT

01-2300-153

- Membrane system with air pressure application for the customization of footbeds

BD AUTOFIT POD RIGHT

01-2300-154

- Membrane system with air pressure application for the customization of footbeds

4 STEPS TO SUCCESS.

We all strive for maximum results and best sell through of our products. To be able to reach this goal we want to:

- Analyze market potential and select the right product and tooling mix.
- Train your sales staff to achieve the best customer satisfaction.
- Support in all aspects for the best sales results.
- Help you meet your sales target.

1

SELECT

- Definition of target group
- Selection of product group
- Evaluate quantity of sold footwear
- Analyzing the potential (footwear sales vs. insole sales)
- Selection of analysis and fitting tools
- Set targets per week/month/year

2

TRAIN

- Intense training of the sales staff
- BD-Only Day
- Education of BD Sales Experts according to the BD Sales Academy status
- Documentation of education program and downloads of training videos
- Certificate
- Continued education

3

SUPPORT

- Assignment of a BD Sales Expert
- Consistent updates
- Active sales support at BD Action Days

4

REFLECT

- Weekly control of sales figures internally
- Check ratio of sold shoes vs. insoles
- Monthly / annual contest

PFI POWER FIT INDEX

THE POWER FIT INDEX

The Power Fit Index (PFI) indicates how strong the overall level of gradual compression is: PFI 30 designates light compression, while PFI 90 is classified as strong and is therefore only found in our performance series.
